Experience

February 2008 - Current

Software analyst and programmer at Germinus (Web 2.0 consultancy department) , *Grupo Gesfor*, Madrid.

- Development manager (participating in the requirements analysis, and in charge of desing and architecture decisions, and the codification with a small developer team under my supervision), in several projects for customers like RBI Spain (Reed Business, a multinational publishing house) or Carrefour Spain, the most relevant ones being *Enterprises directory* (a powerful enterprises and products search engine) and *RBI Replicas* (a publising-oriented group of web portals running with the same Liferay core, focused on SEO improvements)

- Analyst programmer in Educamadrid and Educarex projects, educative and collaborative portals based in Liferay for the regional governments of Madrid and Extremadura

June 2006 - December 2007

Research grant (full-time), *Distributed Systems Laboratory at Universidad Politécnica de Madrid (http://lsd.ls.fi.upm.es/lsd)*, Madrid.

- Development of a virtual databases system for Business Intelligence in J2EE environments for Telefónica Soluciones (O2), using SOAP web services

- Research and development of a software transactional memory system

Education

2000-2006

Master in Computer Science Engineering, *Facultad de Informática, Universidad Politécnica de Madrid*, Madrid.

2007-current

Postgraduate Master in Information Technologies, specialization in Distributed Systems, *Facultad de Informática, Universidad Politécnica de Madrid*, Madrid.
